

Scenario 1: Access to Hosting

As an Inclusivv employee, you're helping to run the Inclusivv membership. You want to control who has access to hosting so that only approved people can create and host a membership conversation. The product team has recently added some new functionality to help with this.

	Tester 1	Tester 2	Tester 3	Other Notes
1: Log in to your account and find a way to turn off general access to host conversations for Inclusivv Membership's topic on The Big Picture of Child Well-Being.				
2. You want to block people from creating and hosting conversations for The Big Picture of Child Well-Being topic for the Inclusivv membership track. Where do you think you should go to accomplish this?				Discoverability of new feature took some adjustment but was highly learnable. <hr/> <i>Useful notes to consider from Tester 3 when visibility settings work gets picked up.</i>
3. Change the settings to remove the "host your own button" and only allow the people you want to create and host your conversations.				
5. Commit the changes				
6. View the live page				Opportunity to allow users to request to host.
